

Can we free India from single use plastic?  
 This time Implementing such a idea has come.  
 May teams be mobilised to work in this  
 Direction. Let a significant step be made on  
 2nd of October

-His Excellency Prime Minister of India

## About Us

UnPlastic India is an initiative by Youth of India Foundation in bringing about an awareness about eliminating the usage of single-use plastic, as envisioned by the Prime Minister of India in pledging to eliminate the single-use plastic from India by 2022. On 5th June, 2019 UnPlastic India was launched by hosting the first-ever UnPlastic Ploggers Run in Siliguri in making UnPlastic Siliguri. UnPlastic India is working holistically in both bottom-up and top-down approach. At the grassroots level, in about 12 weeks now 50 institutions including colleges, schools, hotels, cafes, shops, offices, companies have pledged to incrementally eliminate single-use plastic; 1 dairy farm has successfully led the alternative for delivering milk in glass bottle than packaging in plastic; 18 Non-Governmental Organisations have pledged to co-lead the movement in Siliguri. At the policy level, we suggested the Chief Minister of Sikkim in leading UnPlastic India; shared with Hon'ble Prime Minister of India Lower House (Lok Sabha) Speaker in making the India's Parliament – UnPlastic incrementally by suggesting the alternatives and made some Member of Parliaments to advocate about UnPlastic. Our team is further committed to have 1 million young people pledge towards UnPlastic and suggest the government to pass a bill on UnPlast
